

# Digital storefront

Our digital storefront platform lets you become e-commerce ready quickly and with minimal effort.

### **Auto-import stocks from ERP**

Connect with pre-integrated accounting platform or ERP and import stock details and share on the digital storefront.

### **Discovery**

Add keywords to increase product discovery. Catalogue management comes with pre-populated list of items and HSN codes, which makes it easy for sellers to use the platform.

### **Digital payments**

Pre-integrated payment gateway gives you the option to collect payments digitally by offering additional payment methods like credit cards, debit cards, UPI and net banking. Comes with the option to generate static and dynamic links.

### **Coupons/cashbacks**

Create coupons/cashbacks offers to offer time-bound discounts to buyers.

### **Credit note**

Create and issue credit notes in case of returns.

### **Dashboard and reporting**

Dashboard shows ageing, upcoming and overdue transactions and business health. The transaction report comes with various filters and options to take effective actions.

### **Automated reverse syncing**

Invoices are automatically generated, and reverse synced to the ERPs.
