

# Instant payouts across multiple banks with just one app.

Hylobiz Payouts platform helps businesses to process their payments across multiple banks and channels without having to manage multiple portals or making manual entries between the bank portal and accounting system.

Customers can link their beneficiaries and make transactions seamlessly. All of this can be automated within the customer's internal business tools, using Hylobiz's powerful APIs.

## Prominent use cases across industries

Customers can process all their payout transactions like reimbursements, fund transfer and vendor payments seamlessly. All payments get auto reconciled with their accounting systems

Small manufacturers, distributors, traders etc. can easily use this capability to avoid managing multiple platforms to make transfers and then manually update the transaction status.

hylobiz<sup>®</sup> app available on

## Features

### Auto-import invoices from ERP

Connect with pre-integrated accounting platform or ERP and import bills to make payouts using connected bank accounts of Axis Bank and Yes Bank.

### Pay your vendors

Make payments to vendors using connected bank accounts of Axis Bank and Yes Bank. Bank details of vendors can be easily added and option to add more than one bank detail makes it easy to handle payouts.

### Manage beneficiary details

Customers can maintain bank details of their buyers or suppliers. They can add more than one bank account detail which makes easy to select and initiate transfers.

### Bulk upload

Hylobiz gives the option to upload a file and initiate bank transfers. This is like the bank processes but added advantage is that Hylobiz can reconcile the transaction automatically using the unique reference number.
